

# AQUAZORB

# AquaZorb<sup>TM</sup> Granules

## Water Absorbent - Multi-Purpose Granules

- > *AquaZorb water absorbent granules* are naturally based, biodegradable and non-toxic. They absorb and release **175 - 300 times** their weight in water over several growing seasons, decreasing water use by **30 - 50 %** for improved plant growth and survival, especially useful considering today's variable moisture and weather conditions.
- > *AquaZorb water absorbent granules* help provide a more consistent supply of water and nutrients, by absorbing and storing water and water soluble macro/micro-nutrients, minerals, etc., and releasing them to the plant on an as needed basis.
- > *AquaZorb water absorbent granules* increase seed germination, seedling survival, improve soil aeration, maximize root growth, reduce water use, and optimize overall plant quality and performance.

## Application Rates

- Hydroseeding:** Apply **20 - 50 lbs** per acre; add to tank before mulch, seed or fertilizer.
- Seeding:** Apply 3 lbs per 1000 sq ft., work into first 1 inch of soil (6lbs, 3 in., 9 lbs, 6in.)
- Sod:** Apply 3 lbs per 1000 sq ft., lay sod on top (no need to work into soil).
- Potting Mix:** Mix **2 - 3 lbs** per cubic yard of soil or 1 teaspoon per quart of soil.
