

AQUAZORB

Black Magic

Aqua ZorbTM 25-9-9 + Micros

3 Stage Release - Water Absorbent Fertilizer

- > **Black Magic Extra + Aqua Zorb granules** is specially designed to absorb and release water over several growing seasons in dry soil conditions for improved plant growth and survival, **PLUS** providing a safer, more predictable and broader range of Nitrogen release.
- > **Black Magic Aqua Zorb** contains three different color-coded Nitrogen sources: **Tan** (2-3 month release), **Green** (4-6 month release) and **Blue** (6-12 month release) + **Aqua Zorb granules** which absorb and release **175 - 300 times** their weight in water.
- > The **Green** and **Blue** prills have a much lower salt index <10, compared with ammonium nitrate **105**, ammonium sulfate **70** and urea **75**. Loss of available Nitrogen is **3 times less** than IBDU (isobutylidene diurea), **5 times less** than SCU (sulfur coated urea) and **10 times less** than urea.
- > **Black Magic Aqua Zorb** is designed to release over 6-12 months using the **10, 20 or 30 gram tea bag/seedling** application rate throughout the growing season, with the same 2% Humic Acid and Micronutrient package used in our **Black Magic Extra 25-9-9**.

Guaranteed Analysis

Total Nitrogen	25.05%
22.23% Slow Release Nitrogen	
1.94% Ammoniacal Nitrogen	
0.87% Urea Nitrogen	
Available Phosphoric Acid	9.18%
Soluble Potash	9.26%
Sulphur	4.70%
Magnesium	0.88%
Boron	0.05%
Copper	0.05%
Iron	0.30%
Manganese	0.13%
Zinc	0.12%
Humic Acid	2.0%

L. Pine, Left 313, 10g planted 2006 26cm, Right 410 planted 2007, 41cm, 10g Aqua Zorb (5 months)

Planting Instructions

10 and 20 gram tea bags: Place 2 inches from plug, on uphill side, 1 inch deep

30 gram tea bags: Place 3 inches from plug, on uphill side, 1 inch deep

Aqua Zorb & Fertilizer Cluster

Roots from above, Left 2006, Right 2007 (5 months)
